Rainbow Routes Association is proposing a new barrier free community trail connecting Robinson Drive to the Southview Greenbelt and l'École Publique Hélène-Gravel. The route will begin at the current trail entrance located just East of 811 Robinson Drive, site of the old Corpus Christi School. An official community loop would be provided, which in turn would connect with the school and to the informal trail that extends to Catalina Court and Southview Drive. The new barrier free trail will conform to the Ontario Integrated Accessibility Standards Regulations. This outdoor recreational space will further foster mental and physical well-being by connecting the community to a vibrant natural experience, and also provides an opportunity to rethink active school travel for youth.
